

## LIVE BLOOD CELL ANALYSIS

The test below involved a male in his mid thirties that was in constant exposure to high levels of EMF. Like many men these days, he was in close proximity to electrical equipment all day, and spent a lot of time with computers and game consoles. On top of this, he had a very poor diet and did not exercise. The subject was given a Blushield Portable to carry around with him at all times. A Blushield Plugin model was also installed at his home and was kept going 24/7. No other changes were made to diet or lifestyle during the testing period which was from the 11th January 2012 to the 14th of March 2012.

### Before Blushield

The red cell membranes are ghosting (exploding) due to their weakened state. **Red cells are literally disappearing** while being watched during live blood cell analysis.

There are parasites and crystallization present in the blood. Red cells are bunched together and are of irregular shape.

Tester comment: "High levels of inflammation and oxidation may relate to your lifestyle, occupation or diet."

**Results: Lymphocytes went from 25 to 15, showing a normalization of the immune system. This is reflected in the blood. Obvious changes are apparent and the walls of the blood cells have normalized within a very short period of time. This was very noticeable and very surprising to the tester.**

### After Blushield

**Within 2 months** the red cells have notably stronger membranes and fewer parasites. Despite the subject having a cold, there is a marked improvement in blood quality.

Crystallization has ceased and the red cells are of a more regular shape and distribution. A remarkable improvement despite no change in diet or lifestyle.

Tester comment: "Extremely reduced levels of inflammation and oxidation considering you have not changed your diet or lifestyle/occupation and had a cold."

## TESTIMONIALS

After having migraines for two years, I discovered that there were two 'smart' meters on the house where I rent an apartment. My headaches were worsening in intensity and frequency coupled with vomiting. Also my small dog was having mini seizures. I was ready to try anything. I was having a hard time focusing on my business and would sit up practically all night not understanding why.

Within minutes after plugging in the Blushield, I began to think more clearly. I started sleeping better and within a few days my dog stopped having the seizure episodes permanently!! Also, I am happy to say that I have not had a single migraine going on 5 months!! I now will not live without my Blushield. I carry the Portable with me and take the Ultra with me when I travel. I don't know how I ever lived without it.

Best purchase I EVER made!! The customer support was stellar! Don't wait to feel better!!

Marnie N., USA

I plugged in the Cube immediately after receiving it. In less than ten minutes, I noticed a feeling of calm come over my body starting at my head. I didn't mention it to my husband because I wanted to make sure about it. I mentioned it to him the next day and he confessed he had felt it too, and that is amazing because he is my best skeptic.

Fast forward to today, about two weeks of use, I have experienced better sleep, strengthening of legs, decrease in back pain and stiffness, less ear ringing, less exhaustion, decrease in hair loss, and feeling better overall. I take my Portable Wireless Blushield with me when I leave my house.

Pam V., USA.

I live in a building with a cell phone tower on the roof, I was unable to sleep because of this. It was like a fatigue was overtaking my entire body. Once I received the Blushield Portable and Plugin, I immediately implemented them. Now I am feeling much better and am able to sleep in my apartment for the first time in a week. I was able to sleep for more than five hours.

I also notice an instant difference if I step out of range of the Portable when I am at work. It's like a storm of painful sensation has abated. Many thanks for the great product and all your help.

A Hayward, Saudi Arabia

## WHAT IS EMF?

Electromagnetic fields (EMF), which include wireless radiation or radio frequency radiation, are emitted from all wireless devices and electrical appliances.

These include:

- Mobile phones
- Wi-Fi routers
- Computers
- Lighting
- Television
- Power lines
- Electrical appliances
- Smart meters
- Cell phone towers

## EMF SYMPTOMS

Within seconds, the body at a cellular level recognizes the need to protect itself from attack. Unfortunately, the protein coating on each cell cannot recognize EMF, as our body did not evolve to recognize this unnatural signal.

**As a result, we may experience symptoms such as:**

- Nausea
- Headaches
- Fatigue
- Dizziness
- Sleeplessness
- Skin rashes
- Sore eyes
- Vertigo
- Heart palpitations

## - NOT A THEORY - EMF IS DANGEROUS

Contrary to the telecommunications industry's constant pronouncement of "we don't have enough definitive studies to know whether EMFs are harmful". There are plenty of studies showing the harms of electromagnetic radiation. However, most people don't know how to read and interpret studies, and mostly look to conventional news sources or government agencies to deliver the verdicts to them, which is absolutely not happening in an honest way.

The most condemning example to date is the government commissioned, 10-year long, \$30 million dollar National Toxicology Program cell phone radiation study. The study, and the official peer review panel, unsurprisingly found "clear evidence" of certain types of cancers and DNA damage in a notable percentage of the rodents. Yet they state they are not concerned, because the study was done on rodents and the results can't be accurately transferred to humans, which is a blatantly contradictory statement, as the study was specifically designed in the first place so that it could be clearly interpreted as relevant to humans!

Results from another long-term study at the Ramazzini Institute in Italy were published that replicate the results of the NTP study. This study on over 2,400 rodents also found central and peripheral nervous system cancers (specifically gliomas and schwannomas) from exposure to radio frequency radiation. Scientists aware of the results of both studies are strongly recommending that the IARC (International Agency for Research on Cancer) reclassify radio frequency radiation from "possible" to a "probable" human carcinogen.

There are several websites with compilations and summaries of EMF studies. EMF Portal is a great resource, and is continually updated with new studies. The Bio-Initiative Report summarizes EMF studies in categories of their various affects on health. 23 studies have confirmed Dr. Martin Pall's findings that one major mechanism of biological harm from EMFs is their action on the voltage-gated calcium channels in each of our cells, causing calcium channel flooding which can cause a myriad of health issues. The FCC is ignoring and disregarding this information vital to the health of the world's population.

## HOW DOES BLUSHIELD WORK?

Blushield is a revolutionary form of EMF protection that produces coherent frequencies within the human responsive range, based on mathematical algorithms that mimic nature. It emits frequencies using the same power sources as manmade devices, which creates active, powerful fields. It is essentially "loud" enough to compete against the biologically incoherent non-native EMF fields, so it vastly outperforms the protective devices with weak, passive fields that don't use a power source.

Instead of attempting to block EMFs, which is ineffective or suboptimal for various reasons, Blushield essentially overpowers non-native EMFs with resonant frequencies. If there are harmonious frequencies in our environment that match or exceed the power of the inharmonious frequencies, our bodies will prefer and attune to the harmonious frequencies through a process called sympathetic resonance. Like attracts like. Tuned into the natural, **healing Blushield frequencies**, our bodies no longer perceive the non-native EMF's as a threat, and our immune system begins to restore itself. Our bodies can rest and heal.

Blushield emits scalar waveforms that never stimulate your body twice with the same combination of frequencies at the same amplitude - **mimicking nature**, but much more powerfully. Blushield's coherent field overrides all ambient EMF fields, including wireless radiation.

**Blushield's multiple waveform output is the most sophisticated EMF protection to date**, and is engineered to achieve maximum effectiveness for all living creatures.

Electromagnetic fields absolutely can and do have harmful effects on humans and other life forms. Nature produces its own EMFs, but they are a constantly varying symphony of different frequencies at different amplitudes, never repeating themselves exactly. Blushield devices also work this way, designed after the intricate patterns of nature. Our bodies have evolved with this type of stimulus, which is vastly different than the very new barrage of repetitive frequencies we are now exposed to almost anywhere we live.
